

EAST JORDAN FAMILY HEALTH CENTER

PHYSICIAN EMPLOYMENT OPPORTUNITY

Opportunity Highlights: An excellent opportunity is available for a board certified/board eligible family physician. We offer an attractive salary guarantee with a productivity bonus, plus a full package of benefits that include: employer provided malpractice coverage, health/life/disability insurance, retirement plan, CME stipend, paid vacation, personal, sick and holiday leave. Loan repayment program may be available to qualified individual.

Community Description: East Jordan is located on the south arm of Lake Charlevoix and the nationally designated scenic Jordan River. Midway between Petoskey and Traverse City, East Jordan is rural and offers an excellent quality of life and fully accredited schools that enjoy tremendous community support. Outstanding four season recreational activities include boating, canoing, winter skiing, hunting, fishing, hiking, and golfing.

Site Description: East Jordan Family Health Center is a nonprofit corporation and a federally funded community health center, founded in 1977. 34,000 visits were provided to 10,000 medical users in 2008. EJFHC utilizes a healthcare team approach with physicians and mid-level providers supported by clinical and clerical staff. Having participated in the Midwest Patient Visit Redesign Collaborative, our staff has implemented strategies that have reduced patient waiting time and dramatically increased employee and patient satisfaction. Satellite offices in Bellaire and Central Lake support the healthcare needs of nearby rural communities. Recent restructuring of the leadership team has improved strategic planning. Collaboration with Charlevoix Area Hospital and Northern Michigan Hospital allow for a hospitalist arrangement for inpatient needs. Our center has been Joint Commission accredited since the year 2000. On site services include digital X-ray and mammography, laboratory, dental, counseling, and optometric services. Currently, our health centers are involved in implementing Next Gen Electronic Practice Management and Electronic Medical Records.
